Cross Timber Systems

Skonto Cross Timber Systems uses cross-laminated timber technology to provide the highest-quality construction for private houses, residential and public buildings. This features rapid construction, better thermal insulation, and durability as well as efficient logistics and less waste. At the core of Skonto Cross Timber Systems is respect for nature and its appreciation – all the facilities and theologies used are environmentally friendly. The company has experience in designing, producing and building residential and public buildings, as well as private housing in United Kingdom, Switzerland, the Netherlands and Scandinavian countries. Production of Skonto Cross Timber Systems includes cross-laminated wood panels for floors, walls and roofs, and different load-bearing structures.
